

The Leadership Programme (LP) provides opportunities for participants to develop inter-disciplinary skills to lead sustainable development initiatives appropriate to local, regional or global contexts.

The second ProSPER.Net Leadership Programme was hosted by the Higher Education Leadership Academy in Putrajaya, Malaysia, from **16 to 24 August 2014**. Participants went through a unique experience that will assist them in leading efforts towards developing work with a clearer vision and understanding regarding diverse perspectives, focusing on collaborative efforts, leveraging networks and involving multiple stakeholders. The programme included lectures on leadership, biodiversity, conservation and ecosystem services, as well as urban issues and industrial development from the perspective of multi-stakeholder partnerships to support local development, and field visits which provided different examples of community engagement and insights on the types of required leadership that enable sustainable actions to thrive.
