

Prince of Songkla University (PSU) welcomes teaching faculty, researchers, and postgraduate students to work with sustainable development topics in the following programmes:

Environmental Management  
Agro-Industry  
Natural Resources (Aquatic Sciences & Tropical Resources  
Management)  
Environmental Engineering  
Economics  
Marine & Coastal Resources Institute (Hatyai campus)  
Science & Technology (Pattani campus)  
Technology & Environment (Phuket campus)

Teaching faculty and researchers applying to visit PSU should be active in sustainability related fields and contact a host programme to arrange activities. Short term instruction in a relevant course, participating in a joint academic conference, and joint research projects are all potential areas of engagement. Faculty and researchers granted exchange status must follow the university's rules for visiting faculty and any agreement established between the host institution and the applicant's institution. This may vary from faculty to faculty within PSU.

Those interested may contact the PSU International Office:

Ms. Salma Kosumphant, Head of International Affairs Office and/or Ms. Chongchit Ratyot, International Affairs Office at [psu-international@psu.ac.th](mailto:psu-international@psu.ac.th)

Those interested in contacting the Faculty of Science and Technology, Patani Campus directly may contact:

Ms. Usanee Apibalbae, Faculty of Science and Technology, Patani Campus at [ausanee@bunga.pn.psu.ac.th](mailto:ausanee@bunga.pn.psu.ac.th)

Interested postgraduate students should obtain a letter of acceptance from a relevant professor/adviser at PSU. Postgraduate student colloquiums, student conferences, and joint research projects are all potential areas of engagement. It is the expectation that students who visit PSU should share the knowledge, findings, and experiences at PSU with their home institution after their time visiting. In some particular programmes, those eligible to obtain joint degrees are also encouraged.

For more information on programmes, where exchange students may obtain joint degrees or pertinent credits, see:
