8.30 pm					
9.00 pm					

Nightingale Housing Site Visit

The Nightingale model is development of multi-residential buildings that are financially, socially and environmentally sustainable. It demonstrates a set of systems and process of provision of housing that develop buildings that use the learnings and feedback mechanisms from designers and occupiers who have been involved in these buildings. As part of the site visit, participants will visit Nightingale 1 in Brunswick on Florence Street. For further information, see <http://nightingalehousing.org/nightingale-1>
